DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 8,20,26,28-30 and 32-37 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claimed apparatus is non-statutory as it fails to include structural components. That is, it reads on software per se.

The claimed method is non-statutory as it fails to include a statutory apparatus within the body of the claims.

Claims 8,20,26,28-30 and 32-37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the claims, a plurality of "windows" is vague and indefinite with respect to metes and bounds of a window.

In the claims, a workspace that varies according to a day of the week is vague and indefinite with respect to the metes and bounds of how the workspace varies.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 8,20,26,28-30 and 32-37 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Busit.

The teaching of Buist is of record. The applicant argue that the reference fails to teach a works space comprising a plurality of windows and colors. Given its broadest reasonable interpretation, the figures clearly show separate windows. As to the limitation that the workspace varies according to the day of the week., as the workspace receives dynamic live feeds, it inherently includes this limitation.
